

**Market Forecast Report**  
**Semiconductor and FPD Manufacturing Equipment**

**[2016-2018 fiscal year]**

**January 12, 2017**

**SEAJ**

**Semiconductor Equipment Association of Japan**

## **[Overview]**

This report provides a forecast trend for Semiconductor and FPD manufacturing equipment. The fully-considered results made in this forecast report are by the Semiconductor Research and Statistics sub-committee and the FPD Research and Statistics sub-committee of the Semiconductor Equipment Association of Japan (hereinafter called SEAJ, Chairman Mr. Kazuo Ushida), and as the result of market trend research from both the Board of Directors and auditors (total 19 companies) by SEAJ consensus.

Due to growth in the semiconductor manufacturing equipment market, in addition to high growth in the FPD manufacturing equipment market thought to have carried over from fiscal year 2015, we predict that overall sales of 1.9805 trillion yen for fiscal year 2016, an increase of 23.1%. Assuming there will be a slight increase in the semiconductor manufacturing equipment market and consolidation of the FPD manufacturing equipment market, we have predicted that sales in fiscal year 2017 will increase 0.5% to 1.9902 trillion yen. As for fiscal year 2018, we anticipate the semiconductor manufacturing equipment market will grow slightly and the FPD manufacturing equipment market will further decline, so we have predicted that overall sales will decrease 2.1% to 1.9483 trillion yen.

- (1) **Forecast period**            The fiscal year of 2016 to 2018 for three years
- (2) **Forecast items**            Japanese Equipment and Japanese Market for Semiconductor and  
   Japanese Equipment for FPD manufacturing equipment
- (3) **Forecast results**

### **[Forecast of Japanese Equipment Billings for Semiconductor Manufacturing Equipment]**

We predicted sales of 1.4605 trillion yen, 11.6% increase, for fiscal year 2016 anticipating investment recovery by logic manufacturers and foundries in addition to investment in 3D-NAND. Assuming demand for equipment will recover due to a return to mild growth for electronic devices and semiconductors and in the macro economy from fiscal year 2017, we have predicted that sales will slightly increase 3.4% to 1.5102 trillion yen for fiscal year 2017 and increase 1.2% to 1.5283 trillion yen for fiscal year 2018.

### **[Forecast of Japanese Market Billings for Semiconductor Manufacturing Equipment]**

Since DRAM and image sensor manufacturers are expected to decrease investment, we predicted sales for fiscal year 2016 will decrease 33.0% to 439.6 billion yen. We anticipate that investment in image sensors will resume and in addition to investment in 3D-NAND, we have predicted overall sales for fiscal year 2017 will increase 30.0% to 571.5 billion yen. As for fiscal year 2018, we anticipate a recovery in equipment demand, so we have predicted that sales will increase 13.7% to 650 billion yen.

### **[Forecast of Japanese Equipment billings for FPD Manufacturing Equipment]**

As for fiscal year 2016, Japanese and Taiwanese investments were added to investments that have traditionally focused on the Chinese and Korean markets, so we predicted sales will increase 73.7%, which has been adjusted upward from the previous prediction, to 520 billion yen. Although investment in equipment for small to midsize OLED panels will increase, we have predicted that sales for fiscal year 2017 will decrease 7.7% to 480 billion yen due to the impact of decreased investment in large panels. As for fiscal year 2018, although we expect investment in G10.5 for large panels, we assume the market will consolidate and have predicted sales will decrease 12.5% to 420 billion yen.

# January 2017 Forecast for Semiconductor and FPD Manufacturing Equipment

## ■ 1. Semiconductor and FPD Manufacturing Equipment 【Forecast for Japanese Equipment Billing】

\* "Japanese Equipment Billing " = Japanese manufacturers Domestic and Oversea Billing.

(CAGR : 2015-2018)

	Actual										Forecast			
Fiscal Year	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	CAGR
